About me

I am a PhD student in artificial intelligence at the university of Liège doing researches in deep reinforcement learning with applications to the renewable energy transition. More specifically, my work focuses on applications of deep reinforcement learning for energy trading as well as on the adaptation of these algorithms to solve joint design and control problems. I am open to discuss or collaborate on research projects.

Education

Since 2020	PhD student in reinforcement learning <i>Advisor : Damien Ernst (dernst@uliege.be).</i>	University of Liège
2018 - 2020	Master student in electrical engineering in signal processing and intelligent robotics <i>Summa Cum Laude - 91 %.</i>	University of Liège
2015-2018	Bachelor student in electrical engineering and computer science <i>Magna Cum Laude - 78 %.</i>	University of Liège

Experience

2019	Internship in the Market Modeling & Market View department at Engie Belgium Internship focusing on the forecasting of the electricity imbalance prices.	Engie Brussels
2019	Junior researcher at the Montefiore institute Internship focusing on the study of deep RL solutions for trading on the intraday electricity market.	University of Liège
2019	Summer school on bandits and RL. Summer school organized by Sequel and Inria.	University of Lille
2017 - 2019	Pupil-monitor. Monitor in applied geometry, C-language, electromagnetic energy conversion, and computer structures.	University of Liège

Publications

Jointly Learning Environments and Control Policies with Projected Stochastic Gradient Ascent

Adrien Bolland, Ioannis Boukas, Mathias Berger, Damien Ernst

arXiv preprint arXiv :2006.01738

Distributional Reinforcement Learning with Unconstrained Monotonic Neural Networks

Thibaut Théate, Antoine Wehenkel, Adrien Bolland, Gilles Louppe, Damien Ernst

arXiv preprint arXiv :2106.03228, 2021

Graph-Based Optimization Modeling Language : A Tutorial

Mathias Berger, Adrien Bolland, Bardhyl Miftari, Hatim Djelassi, Damien Ernst

preprint, 2021

A deep reinforcement learning framework for continuous intraday market bidding

Ioannis Boukas, Damien Ernst, Thibaut Théate, Adrien Bolland, Alexandre Huynen, Martin Buchwald, Christelle Wynants, Bertrand Cornélusse

Machine Learning, 2021

Teaching

Numerical Optimization	University of Liège
Introductory course on conic programming and convex optimization algorithms.	
Reinforcement Learning	University of Liège
Course introducing dynamic programming, bandit theory, and reinforcement learning.	
Energy Markets	University of Liège
Introductory course on the organization of the energy markets in Europe.	

Skills

Mathematics Algebra, Analysis, Numerical analysis and optimization, and System theory.

Applied Mathematics Deep Learning, Reinforcement Learning, Optimization, and Statistics.

Computer Science Programming techniques, Data structures and Computer structures.

Physics Global formation as an engineer with specialization in electromagnetism and electricity.

Languages

French Native proficiency.

Dutch Bilingual proficiency.

English Professional working proficiency.

Interests

I like music and played piano during three years. I have played tennis and I do ice-skating in my free time.
